CHARACTER

# ALT CUNNINGHAM

One of the most talented netrunners of the early 21st century, Alt created the Soullkiller program, capable of creating a digital engram of a person's personality and memories – and became its first victim. Though some may remember her as Johnny Silverhand's girlfriend, and the reason for his long-standing vendetta against Arasaka, her engram program shaped the tone of future corpo cold wars and plays a major role in Night City's landscape in 2077.
